

# EMAIL DELIVERABILITY PACKAGE

# Email Deliverability

Thanks so much for booking your Email Deliverability Package! I'm excited to help you get everything set up properly so you can stop worrying about spam folders and start reaching your audience with confidence.

## What to Send Me

✓ **Where your domain is managed** (example: Namecheap, Cloudflare, Siteground, etc.) and **username or email for login, along with the password**

✓ **A link to the platform you use to send emails** (example: Subtrio, GoHighLevel, Kit, Mailchimp, MailerLite, etc.) and **username + password** for it.

✓ **The email address you want to send from** (example: [hello@yourdomain.com](mailto:hello@yourdomain.com))

If you prefer, you can create a temporary admin account using [hello@natashaniya.com](mailto:hello@natashaniya.com) and delete it after setup is complete.

## About Two-Factor Authentication (2FA)

If your domain registrar or email platform has two-factor authentication (2FA) enabled, please temporarily turn it off while I complete your setup.

2FA can block me from accessing your account even with the correct username and password.

Once the setup is finished, you can re-enable 2FA.

## **How to Send Your Info**

Please send your login details using one of these methods:

**Preferred:** Share via 1Password or LastPass to  
hello@natashaniya.com

**Or:** Send via email to hello@natashaniya.com

**Or:** Use a secure one-time note service like QuickForget and send the link to hello@natashaniya.com

Choose whichever option feels safest and easiest for you!

## **Timeline**

Once I receive your info, I'll complete your setup within 2–3 business days.

You'll get a confirmation email once everything is tested and ready to go!

## **Questions?**

If you have any questions or need help sending your info, email me at hello@NatashaNiya.com. I'm happy to help!
